

MNC Marine Container

Mobile Entertainment- and IT systems with Communication

To charter a vessel for a limited period is costly. If you also have to pay for the wiring of your IT systems you want to keep down the number of contact points and TV sets. You will certainly also want to reuse a well-functioning and well-tuned system.

With MNC Marine you can now create an IT standard regardless of which vessel you charter and from whom.

MNC Container

- AC, 19" Server Rack, UPS, Antenna Brackets, camera surveillance

How we do it:

You find a ship for your mission, MNC Marine sets up the IT system on the ship according to the IT functionality agreed upon. MNC Marine performs cabling and mounting of computers, video lounges, TV lounges, WIFI access points, printers, RFID readers, CCTV and network infrastructure. MNC Marine monitors hardware and software and provides 24/7/365 support on the entire system.

MNC Marine works thoroughly and controlled so as not to interfere with the activities on board. MNC Marine are available 24/7/365 and understands "crew welfare".
